Week 4 Assignment

Submit a single program which displays the output to each problem. See the Program Grading Rubric for details on how your program will be scored. Points will be awarded as follows:

- Documentation & Style (10%)
  Program header
  Clear documentation between each sub-problem

- Syntax (50%)

- Correctness (10%)

- Logic (10%)

- Reusability (10%)

- Usability (10%)

- Total 40 Pts

Programming Problems

Please complete the following programs from the "Programming Challenges" section of Chapter 11 of your textbook. They are listed at the end of the chapter.

Please compete the following four problems: #1, #2, #6, #11

#6 NOTE - You only need to enter three (3) players worth of data.

#6 NOTE – The part about different teams doesn't make sense. Just calculate the total goals for everyone.

#11 NOTE – You can just do five (5) items in the budget.

When you are finished, then please submit your .cpp file through Canvas.
